# Dewey Philosophy

A man by the name of John Dewey believed that schools had to be more than textbooks, chalkboards, and learning by rote. Students were to be innovative in every aspect of life; academically, vocationally and socially. Schools were to stimulate student interest and to involve students with their peers and teachers. This dream was fulfilled in 1969 when the new school, a school for our time, John Dewey H.S. was built.

" Education is a social process  
....Education is growth  
....Education is not preparation for life  
....Education is life itself." - *John Dewey*
